

Inquiry-Based Science

What is inquiry-based science?

At Oneiro, we adopt an investigative approach to science where students are provided with opportunities to investigate a problem, search for possible solutions, make observations, ask questions, test out ideas, and think creatively and use their intuition.

How does inquiry-based science help students?

Inquiry-based science challenges students' thinking by engaging them in investigating scientifically orientated questions where they learn to give priority to evidence, evaluate explanations in the light of alternative explanations and learn to communicate and justify their decisions.
